Goals Statement

Numerous, Nebulous; NonLinear ...

Internshipment with Ewha Womans' Embedded Software Research Lab is fully unexpected and far exceeds my well documented wildest imaginations. Eclipsing clicheic obtainment of work experience, i will realize a sought after opportunity of exposure and immersion in epistemic community as far removed from my own as possible. Leveraging the countless gifts of knowledge Carroll University has bestowed onto me, i will broaden my scope of exposure, complete several long-term projects, and perhaps release a bit of research.

I have a lot of work ahead.

- Benjamin Haos
